

BeFinder Manual System Starter Kit Price List

**Consumables and equipment needed to setup the
BeFinder Fluorescence Method**

Included in the terms of purchase of this product is a limited license from Berylliant Inc for its use to detect beryllium using the technology owned by Berylliant. Further, the technology rights from Berylliant Inc under this license are only conveyed when the fluorescence detection hardware is purchased from Berylliant Inc. or its appointed agent. The technology from Berylliant is covered under several patents and pending patents, a list of which can be obtained from Berylliant Inc.

| Qty. | Product | Unit Price | Unit price when ordered in quantities of 5 units or more | Unit price when ordered in quantities of 10 units or more |
|------------------------------|---|-----------------|--|---|
| Consumables | | | | |
| 1 | BeFinder CH-A: Chemical Kit- 96 tests: 500ml of dissolution solution (CH-1) and 220ml of detection solution (HS-3). This is enough detection solution and dissolution solution for 96 runs plus 24 standardizations. | \$3,338 | \$3,129 | \$2,979 |
| 1 | BeFinder ST-A: Set of 5 certified standards for calibration, each in a quantity of 100ml. The concentrations of Beryllium in the standards are 0ppb, 10ppb, 40ppb, 200ppb and 800ppb. Standards used to prepare 1000 calibration curves of five points. Each calibration set can be used repeatedly over a period of three days when stored properly. | \$1,896 | NA | NA |
| 1 | BeFinder CC-A: Set of consumables for standards | \$692 | NA | NA |
| 1 | BeFinder CO-A: Consumables kit for samples-96 tests | \$1,219 | NA | NA |
| Equipment | | | | |
| 1 | BeFinder PR-A: Processing Kit: Contains heater block for high fired beryllium oxide. | \$4,758 | NA | NA |
| 1 | BeFinder Fluorometer (FI-B) + Optical Kit (FM-B) | \$9,500 | NA | NA |
| TOTAL FOR STARTER KIT | | \$21,403 | | |

Prices are subject to change without notice | All prices FOB Tucson | Sales tax is not included
